

TAM LE

Cincinnati, OH | (513) 602-1510 | le3t6@mail.uc.edu

Website: tamle.site | LinkedIn: linkedin.com/in/tamle06 | Github: github.com/xiuxiu06

EDUCATION

University of Cincinnati, Cincinnati, Ohio
Bachelor of Science, Computer Science (Honors)
Minor, Information Technology

Exp. Graduation: May 2029
GPA: 3.92

SKILLS

Programming Languages: Python, C/C++, JavaScript/TypeScript, SQL, HTML/CSS, MATLAB

Technologies: Git/GitHub, React, Next.js, Node.js, Express.js, MongoDB, REST APIs, Linux, PyTorch, TensorFlow, Hugging Face, NumPy, Scikit-learn

EXPERIENCE

Data-Centric Intelligence Lab – University of Cincinnati

May 2026 – Aug 2026

AI Research Intern | Industry Collaboration with Valvoline

Cincinnati, Ohio

- Built a data pipeline to clean and combine messy manufacturing and lab data from multiple tables, processing 5,500+ process orders into 3,800+ structured datasets for analysis and model training
- Developed and tested Graph Neural Network (GNN) models to predict lubricant quality and blend pass/fail outcomes using classification and regression
- Collaborated with Valvoline engineers and university researchers, presenting data findings, model results, and project progress

Timme Lab – University of Cincinnati

Jan 2026 – May 2026

Machine Learning Research Assistant

Reading, Ohio

- Developed a machine learning pipeline using ResNet-50 to predict fluid volume from images for automated measurement in head-fixed mouse experiments
- Built and tested an image acquisition and processing workflow integrating an OpenMV camera, MATLAB, and experimental hardware to collect consistent training data
- Evaluated and improved model performance through data preprocessing, model training, and validation, contributing to an automated computer vision system for behavioral research

RevolutionUC Hackathon

Sep 2025 - Present

Web Developer

Cincinnati, Ohio

- Developed and maintained the hackathon website using Next.js and TypeScript for one of the Midwest's largest in-person hackathons
- Built interactive UI and animations using Three.js and GSAP
- Developed an internal admin dashboard using Next.js and REST APIs to manage hackathon data and organizer workflows

PROJECTS

EcoCart – AI Shopping Extension (Hackathon winner) | *React, Node.js, Gemini API, Hugging Face* | [Demo](#) **Nov 2025**

- Built an AI Chrome extension that recommends affordable, eco-friendly alternatives for products in Amazon carts
- Developed the full-stack ML pipeline for product categorization and sustainability scoring with fast vector search
- Won 2nd Place, Best Green Tech Hack, and MLH Best Use of Gemini API at MakeUC 2025

Potato Disease AI Classifier | *Python, FastAPI, TensorFlow, Quarto* | [Demo](#)

Jun 2025

- Built an image classification app to identify potato plant diseases from uploaded images
- Trained and evaluated a CNN on labeled plant images using TensorFlow
- Deployed the model with FastAPI to provide real-time disease predictions

QUALIFICATIONS

Adobe Certified Professional in Visual Design

May 2023

AWARDS & HONORS

Top Student Active in ACM/IEEE and Annual Hackathon Award

Apr 2026

Dean's List

Dec 2024 - Present

UC Global Scholarship

Aug 2024

College of Engineering and Applied Science International Outreach Scholarship

Aug 2024

AVAILABLE FOR CO-OP: SPRING/SUMMER 2027
