EDUCATION

University of Cincinnati, Cincinnati, Ohio
Bachelor of Science, Computer Science
Minor, Information Technology

Graduating: May 2029
GPA: 3.88

SKILLS

Programming Languages: JavaScript, HTML, CSS, Tailwind CSS, Python, R, C, C++, SQL, MATLAB, LabVIEW

Frameworks & Tools: React, Node.js, Vite, Git, Material UI, REST APIs, Virtual Machines, Quarto

Operating Systems: Ubuntu (Linux), Windows 10 & 11

PROJECTS

EcoCart – AI Shopping Extension (Hackathon winner) | *React, Node.js, Gemini API, Hugging Face* | [Demo](#) **Nov 2025**

- Collaborated in a team of 4 to develop an AI-powered Chrome extension that suggests affordable, eco-friendly alternatives directly from users' shopping carts using the Gemini API and Hugging Face NLP models.
- Built a full-stack system with React, Node.js, and Zilliz vector database to enable real-time product categorization, sustainability scoring, and personalized recommendations.
- Won Second Place, Best Green Tech Hack, and MLH Best Use of Gemini API at the MakeUC 2025 Hackathon.

Personal Portfolio Website | *HTML, CSS, JavaScript, Figma, GSAP* | [Demo](#) **Sept 2025**

- Designed the UI in Figma and developed a responsive single-page portfolio with smooth scrolling and horizontal project showcase
- Enhanced UX through responsive images, accessible navigation, and ARIA support
- Optimized for cross-device compatibility and deployed to GitHub Pages

Potato Disease AI Classifier | *JavaScript, FastAPI, TensorFlow, Quarto* | [Demo](#) **Jun 2025**

- Built full-stack ML application to classify potato diseases with real-time image processing and prediction capabilities
- Trained CNN model on agricultural dataset and deployed via REST API with automated CI/CD pipeline
- Created professional documentation and interactive demo showcasing complete project workflow with Quarto

Movie Discovery App | *React.js, Tailwind CSS, TMDB API* | [Demo](#) **July 2025**

- Built a responsive movie app with infinite scroll, debounced search, and trending features
- Developed full-stack functionality with Appwrite for real-time CRUD and custom queries
- Designed a mobile-first UI with Tailwind CSS, glassmorphism, and animations; deployed on GitHub Pages

ACTIVITIES

RevolutionUC Hackathon | *Web Developer*

- Built responsive website for the hackathon with HTML, CSS, JavaScript, and Astro
- Collaborated with branding and backend teams for seamless design and data integration
- Created motion design and page flow animations using GSAP to enhance user experience

Quang Tri Model United Nations | *Co-Head of Design Department*

- Led a team of 5 and collaborated with other departments to organize 3 successful events.
- Directed design and creative strategy, maintaining a cohesive visual identity across all platforms.
- Managed vendor partnerships and printing processes to ensure timely delivery and budget control.

Youth Campaign Club | *Design & Media Leader*

- Conceptualized the design of lucky envelopes, calendars, and stickers for sales, generating funds.
- Initiated collaborative brainstorming sessions and conducted design evaluations for the visual content.
- Sold 10,000+ products, securing funds for 100+ disadvantaged children and families in need.

QUALIFICATIONS

Adobe Certified Professional in Visual Design **May 2023**

Adobe Certified Professional in Visual Design using Adobe Photoshop **May 2023**

Adobe Certified Professional in Graphic Design & Illustration using Adobe Illustrator **May 2023**

AWARDS & HONORS

UC Global Scholarship **Aug 2024 – Present**

College of Engineering and Applied Science International Outreach Scholarship **Aug 2024 – Present**

AVAILABLE FOR CO-OP: SPRING 2026
