EDUCATION

University of Cincinnati, Cincinnati, Ohio

Exp. Graduation: May 2029

Bachelor of Science, Computer Science (Honors)

GPA: 3.92

Minor, Information Technology

- Relevant Coursework: Data Structures, Database Management, System Administration, Probability and Statistics

EXPERIENCE

AI Research Intern – Industry Collaboration with Valvoline

May 2026 – Aug 2026

Data-Centric Intelligence Lab, University of Cincinnati

Cincinnati, Ohio

- Built a pipeline integrating 5,500+ manufacturing orders into 3,800+ structured datasets for analysis and training
- Developed and evaluated GNN models for lubricant quality prediction and blend pass/fail classification
- Built a Streamlit dashboard to visualize process data, quality metrics, adjustment history, and model outputs
- Presented technical findings and model results to Valvoline engineers and university researchers

Machine Learning Research Assistant

Jan 2026 – May 2026

Timme Lab, University of Cincinnati

Reading, Ohio

- Developed a ResNet-50 computer vision pipeline to predict fluid volume from experimental images
- Integrated OpenMV camera, MATLAB, and lab hardware for automated image acquisition and processing
- Improved model performance through data preprocessing, training, validation, and error analysis
- Documented experimental workflows, model development, and results for reproducibility
- Contributed to research paper writing and technical documentation for the project

Web Developer

Sep 2025 - Present

RevolutionUC Hackathon

Cincinnati, Ohio

- Developed and maintained the RevolutionUC website using Next.js and TypeScript
- Built interactive UI components and animations using GSAP
- Created an internal admin dashboard with Next.js and REST APIs to streamline organizer workflows
- Coordinated with teams across five departments to support a hackathon with 800+ registrants and 300+ attendees

PROJECTS

EcoCart – AI Shopping Extension | [Demo](#)

Nov 2025

Hackathon Winner

- Built an AI Chrome extension that analyzes Amazon cart items and recommends affordable, sustainable alternatives
- Developed a recommendation pipeline using product classification, Gemini analysis, and vector similarity search
- Collaborated in a four-person team to design and implement the end-to-end application
- Won 2nd Place, Best Green Tech Hack, and MLH Best Use of Gemini API at MakeUC 2025
- Tech: React, Node.js, Gemini API, Hugging Face

Potato Disease AI Classifier | [Demo](#)

Jun 2025

- Built a CNN-based image classifier to identify potato plant diseases from uploaded images
- Trained and evaluated the model using TensorFlow, achieving 93% test accuracy
- Deployed the model with FastAPI for real-time inference
- Tech: Python, FastAPI, TensorFlow, Quarto

AWARDS

Top Student Active in ACM/IEEE and Annual Hackathon Award – UC's Department of Computer Science

Apr 2026

Top 5 Finalist, Innovation Challenge (Fall 2025) – UC's Center for Entrepreneurship

Nov 2025

Dean's List

Dec 2024 – Present

SKILLS

Languages: Python, SQL, R, C/C++, JavaScript/TypeScript, HTML/CSS, MATLAB

Frameworks: React, Next.js, Node.js, Express.js, FastAPI

Libraries: PyTorch, TensorFlow, Scikit-learn, Hugging Face, Pandas, NumPy

Tools: Git/GitHub, AWS, Linux, Docker, Streamlit, PostgreSQL, MongoDB, REST APIs, ETL/Data Pipelines
